NEW Range ULTRA Fast +

High spec / High performance

New ALOGIC cable design language

ALOGIC's Ultra Fast Plus is born to weather the push and pull of your daily charging regime. Your go-to cable any time you need to give your iPhone, iPad and iPod a top-speed battery boost. An arterial, too, to rapidly transfer data between your Lightning devices, laptops and computers.

High Bend Life

Bendable. Not Breakable.

Premium Cable Materials

People who use smartphones, tablets and laptops get burned by charger cables all the time. Some, literally (ouch). The Ultra Fast Plus is the charger cable you'll actually be glad to have at home. Cocooned in a fashion-forward jacket of double-braided nylon and cotton, this powerhouse won't break on you. But, oh, will it bend and snake. Behind couches, under beds, in car consoles, and all elsewhere cables and chargers coalesce. Our tests show it can absorb the stress of 35,000 bends in its lifetime.

5 YEAR Warranty

Takes Life's Hardest Knocks.

Backed with Big Warranty

It ends badly with so many device-charging cables. Not the Ultra Fast Plus. It's so durably constructed inside and out we've stamped it with a five-year warranty. Plug your devices in for a love story that's just waiting to happen.

Smaller Cable Connector

Goes Where Other Cables Can't.

A Connector for Cramped Spaces

With its small metal connector, the Ultra Fast Plus cable is easy to plug into spaces off-limits for other cables (unless you want to lift furniture to use those other cables). Its premium metal connector design enhances its long-term value too.

Certified Safe

A Cable For Safe Spaces.

Certified for your Safety

Lightning cables that aren't certified for safety and performance can be faulty and hazardous. The Ultra Fast Plus, however, is one of the first Lightning Cables on the market to be approved by Apple. The Apple MFi (Made for iPhone, iPod, iPad) badge is endorsement the Ultra Fast Plus safely charges Apple devices it's connected to at optimal speeds.

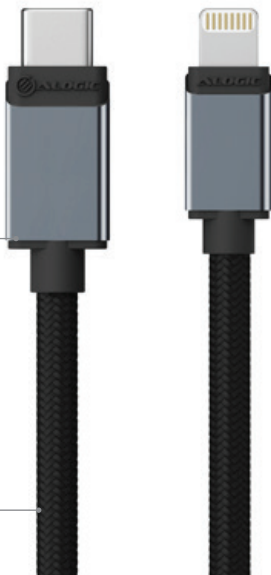

ARMOURED BODY

Crafted from premium metal alloy for superior strength and quality

FLEXIBLE CABLE

Capable of withstanding multiple bends through natural use

DURABLE BRAIDED CABLE

Double braided nylon cable provides added durability with no compromises

LAYERS OF PROTECTION

Layers of insulation to protect the signal's purity for best performance

NEW Range Elements Pro

Entry level product with high specs

High performance

In the world of charger cables, tough should never mean stiff. Sure, ALOGIC's Elements Pro Cables have the toughs to take the daily push and pull of busy households and offices, but it also has the flexibility to bend, twist and fold anyhow you need. Get the speedy charges and smooth data transfers you expect from your cable today. Get them everyday with the Elements Pro.

Tough Outside. Tough Inside.

Built for Your Daily Charging Regime

The Elements Pro cable features double-braided sleeving for ultra-resilience in the face of constant strains and pressures inevitable with cable handling. The Elements Pro also features strong insulation that fortifies its health, so you can charge with confidence.

Gymnastic Bendability.

Squeezes into Confined Spaces

Although the Elements Pro's exterior is extremely strong, the cable's reinforced braiding ensures its highly flexible too. Tightly bundle the Elements Pro into your purse or bag pocket, and freely twist and maneuver it into your device and charger ports.

The Elements Pro is also housed in an extremely robust and bendable connector shell that you can squeeze into the confined domestic and office spaces other cables can't reach. With the Elements Pro in your hands, you have a cable that can absorb more than 30,000 bends.

NETWORK CABLES

ALOGIC CAT6 snagless patch cables are ideal for transferring large volumes of voice, data, video and communications signals. ALOGIC CAT6 cables can help to improve the networks speeds by reducing impedance loss and network return loss.

Each of the individual pairs of cables are bonded together to help maintain the twist-spacing throughout the line right up to the termination point. This design minimizes NearEnd Crosstalk (NEXT) levels between them which leads to improved performance, low insertion loss and higher data rates.

Features

- Engineered to meet and exceed the ANSI/ TIA/EIA568-C.2 Category 6 requirements.
- Compatible with T568A and T568B wiring.
- Category 6 UTP cable wired straight through. 24 AWG, gold plated 8x8 (RJ45) connectors.
- Snag-free strain relief boot provides secure and accurate connection.
- Suitable for 1000BASE-TX Fast Ethernet, & Lower; Performance rated beyond 550 MHz.

The Ultra Slim Cat6 Cable are constructed of 28 AWG, unshielded, twisted pair, stranded copper with LSZH jacket and high performance RJ45 modular plugs.

Space Saving Design - Reduced Diameter: The smaller cable diameter allows twice the amount of cable to be routed through cable managers and pathways compared to traditional Cat6 patch cables. This saves valuable space in a high density environment and at the same time improved air flow and cooling.

Flexible Cable - Small Bend Radius: Use of UTP stranded 28 AWG copper cable allows for a very flexible patch cable with tight bend radius suitable for high density installations and superior cable management.

Features

- Exceeds all ANSI/TIA-568-C.2 Category 6 and ISO 11801 Class E Edition 2.1 electrical performance requirements.
- Ultra Slim design saves valuable space.
- Suitable for high density environment.
- Flexible cable allows for high bend radius.
- 50u gold plated connected connectors and 100% copper construction.
- Fully Moulded tangle Free Snag-less boot allow for a clean and time saving install and move.
- Available in ten colours for colour coding your installation
